# Political challenges of economic reforms

The key challenge for reforms was the internal political instability in Azerbaijan which was caused, first of all, by the Karabakh conflict. In 1992 four of President were replaced (two of them had been acting president, but the fact remains). Nevertheless, several concepts for reforms oriented towards the creation of a market economy, in varying degrees, were prepared during that period.

# The major components of the reform policies

- ✓ price liberalisation,
- ✓ foreign trade liberalisation,
- ✓ the introduction of the national currency,
- ✓ the creation of an effective banking system,
- ✓ providing macroeconomic stability,
- ✓ state property privatisation,
- ✓ implementation of land reform,
- ✓ promoting the development of the private sector,
- ✓ co-operation with international financial institutions,
- ✓ attracting foreign investments,
- ✓ the implementation of institutional reforms
- ✓ the management of oil income.
