

Many types of women's labor prohibitions should be "banned"!

Should there be prohibited professions for women? It was the main topic of the conference “Prohibited Labor Areas for Women: isn't it time to lift it?” organized by the Entrepreneurship Development Foundation with the support of the US Agency of International Development (USAID) on June 25 in Baku.

The conference was attended by US Ambassador Earle Litzenberger and Director of the USAID Mission to Azerbaijan Singh Jaidev, MP Vahid Ahmadov, representatives of government agencies and NGOs. Welcoming the conference participants, US Ambassador Litzenberger spoke about women's careers and jobs in Azerbaijan, supports the removal of restrictions on the use of on-the-job labor.

MP Vahid Ahmadov noted that the ban could be reduced, but can't be eliminated completely.

Hafiz Hasanov, a lawyer and head of the Center for Law and Development, made a keynote speech.
